## PROFESSIONAL SUMMARY

Creative Senior Software Engineer and AWS certified solutions architect offering 4 years of experience working in a SCRUM environment as part of Integration team in Pharmaceutical sector. Thrives within tight deadlines by applying agile development strategies. Self Learner and Highly Adaptable to change and new platforms.

## EXPERIENCE

### Senior Software Engineer

May 2019 - Aug 2022

#### Accenture

- Designing and developing solutions as part of middleware/Integration Team in an enterprise application deployed in Weblogic application.
- Experienced in developing rest API's in a enterprise level three tier web application.
- Created Workflows using Camunda Modeler to automate the existing solutions.
- Fully automated a complex integration project that was unmaintainable, which made the business invest more in further enhancements. The time taken to perform the load was reduced from 5 days to 1 hour (97.5 %).
- Created and optimized DB objects to perform complex business logic. Refactored and rewrote large packages into smaller maintainable objects (up to 40% size).
- Worked closely with application owner and Scrum team in all phases of SDLC including analysis, design, coding, unit testing and deployment.
- Played a pivotal role as a part of an Agile Scrum team actively contributing in all Scrum events.
- Serve as primary contact for the client and maintain healthy relationship to guarantee continuous business growth.

### Associate Software Engineer

Aug 2018 - Apr 2019

#### Accenture

- Consult with users, management, and technical personnel to clarify business issues, identify problems and suggest changes/solutions
- Support incident management and problem management.
- Integrating systems by creating interfaces using java and pl/sql as per business logic.
- Manage and coordinate hot fix and maintenance releases.
- Provide support to the business during day-to-day activities and ad-hoc requests during on-call.
- Gain detailed knowledge of all business flows and the application architecture for supported integrations.
- Actively participate in requirement discussion and all phases of product development.
